Description

Dromex® Viper seamless, double dipped coated, PVC (Polyvinyl) gloves are extremely soft and flexible in comparison to traditional PVC gloves.
Provides enhanced dexterity and protects the hands and arms against the hazards of chemicals, mechanical risks and microorganisms.

Dromex® Viper 35cm length gloves feature the following:

- Extra length cuff for added arm protection.
- Gauntlet cuff on the wrist for a comfortable fit over garments sleeves.
- Textured palm for grip in wet and oily environments.
- Impermeable protection.
- High abrasion protection and tear resistance.
- A comfortable cotton liner absorbs perspiration for extended wear.

Suitable for use when handling chemicals, tools and working in processing applications such as fishing, assembly, metal fabrication, chemical processing, petrochemical refining, metal treatment (acid, plating), waste water and water treatment industries.
A comfortable cotton liner absorbs perspiration for ultra-comfortable extended wear.

Viper chemical protection is as follows:

- Methanol (A) – Level 1
- n-Heptane (J) – Level 1
- 40% sodium hydroxide (K) – Level 6
- 96% Sulphuric Acid (L) – Level 4

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment.
Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Compliance & Conformity

Complies with the requirements of CE type examinations EN 420:2003+A1;2009 innocuousness and dexterity EN 388:2003 (3,1,3,1) Mechanical risks,
EN 374 - 2:2003 and EN 374 - 3:2003, protective gloves against dangerous chemicals and microorganism for compliance with directive 89/686/EEC .

Specifications

Style:	Re-useable, royal blue, 35cm length, soft and flexible PVC glove, winged thumb, with a textured palm
Liner:	Cotton
Palm:	1.8mm ± 5 %
Back:	1.8 mm ± 5 %
Cuff:	0.65 mm, 35cm Length, gauntlet style
Mass:	± 320g Per pair (size 10)
Additional:	AZO free/ Chromite 6 free

Packaging, Storage & Obsolescence

Dromex® Viper gloves are packed as individual pairs in a polybag and sold 60 pairs per carton for shipping.
Store in a cool, dry, dark place. Stored correctly, the gloves physical properties will not change for up to three years.

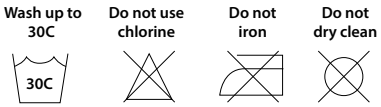

Cleaning & Maintenance

Gloves should not be left in contaminated condition if re-use is intended especially if potential hazards exist. Rinse gloves in running water before removal from the hands and remove excess contaminant.
Should removal of contaminant not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

These gloves may then be de-contaminated as indicated below:

- In case of superficial dirt: Clean with mild soap and water. Wipe dry with a cloth and hang in a ventilated area to dry naturally away from any direct fire or a source of heat, even for items that get wet during use.
- Before use, always conduct a visual inspection by checking the glove integrity and patency (no punctures, seam failure etc...).

We recommend that no bleaching or oxidising ingredients or any fabric softeners be used.

Due to a wide variety of possible constructions and combinations with other materials we recommend to always consult your professional cleaning service to determine the best suitable cleaning method.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for.
Please consider recycling.

Sizes Available

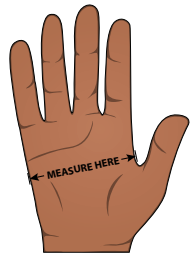

9-10

Code	Size	Palm Length
VIPER-9	M/L	110mm (±2mm)
VIPER-10	L/XL	120mm (±2mm)

** As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.*

** Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accomodate a wearer's preferences.*
